Deane Pond

Greene Twp., Androscoggin Co., Maine

elevation 440 ft. area 10 acres

DEANE POND

Greene Twp., Androscoggin Co.
U.S.G.S. Lake Auburn East, Me. (7.5')

Fishes

Chain pickerel

Redbreast sunfish

Physical Characteristics

Area - 10 acres

Maximum depth - 14 feet

Temperatures:

Surface - 79°F

12 feet - 55°F

Principal fisheries: Chain pickerel

Deane Pond is a small, shallow, weedy pond that is relatively remote. This pond thermally stratifies during the summer and an oxygen deficiency develops below seven feet. There is no suitable water for coldwater fisheries management. A self-sustaining fishery exists for chain pickerel and local anglers occasionally fish the pond. In addition, a few anglers report that bullheads are in the pond, but the Maine Dept. of Inland Fisheries & Wildlife did not confirm their presence during the survey.

A private access road exists off Quaker Ridge Road, but permission is required. Also, a couple of access trails lead into the pond's eastern and western shorelines.

Surveyed - August 1995

(Revised - 1998)
